Composition in Photoshop. How to make collages. How to make collages in photoshop. How to make a collage in photoshop. How to make a collage in photoshop cs6. How to make collages in photoshop cs6. How to make collages from photos. How to make a collage in photoshop cs6 - lesson for beginners In this tutorial we will learn how to make collages in photoshop , using several filters. For our collage we will use two colors - black and purple. Open Photoshop and create a new document. Since we will be making a collage, we will use an aspect ratio of 1:1, that is the width will be equal to the height. 2. Set the parameters for the grid in the document settings: Width and height of the grid, width - 100, height - 10 pixels. I have a grid size in this case 800 pixels in height, so the height of 20 pixels I will increase in the grid settings, we will not reduce the height, if it will not be necessary for the collage? 3. Create a new layer by clicking on the icon at the bottom of the Layers palette. (Click on the layer palette to show it); 4. Let's load the selection at the top edge by clicking on the icon at the bottom of the layer palette and then holding down the Shift key. 5. In the Layers palette, select the loaded selection by clicking the selection icon that appears. 6. Add a Hue/Saturation adjustment layer and remove the saturation from the yellow color (in this case, the red brick color) using a small black brush. 7. Paint the brick wall green and add a Hue/Saturation adjustment layer, only this time in the green color reduce the saturation. 8. Change the color of the brick by adding the Hue/Saturation adjustment layer to the green color and reducing the saturation. 9. Now make the brick wall rougher.
