The Tarnished Kingdom is a land in the Lands Between where many of the people have been subjected to plagues for 500 years, a hero who has received a Tarnished Ring is called forth, and he sets forth on an adventure that will determine the fate of the entire world. During the journey, you will be called on to confront monsters, develop new weapons and magic, and make new friends. Your choices will impact the tale, including the ending of the story. Your character has attributes, skills, and attributes that are split into four categories. By equipping them to your character, you will be able to learn powerful new skills and unlock various effects. The more you enhance your attributes, the more skilled you become. Along the way, you will be able to make new friends by banding together with other players online, just as you experience the world through your character's eyes. the central portion of the tube and the inner diameter of the support structure are small with respect to the diameter of the tube, the weight of the support structure is minimal. This facilitates stabilization of the support structure along the longitudinal axis of the tube. Further, the fabrication of the support structure is less time consuming. The support structure of the present invention has a side wall which is connected to a top wall and a bottom wall. The side wall, bottom wall and top wall cooperate to define a central cavity into which a portion of the upper end of the tube is received. Preferably, the side wall, bottom wall and top wall are integrally formed from the same material as the tube. As such, the entire support structure is readily integrally formed with the tube. Further advantages and features of the present invention will become apparent from the following detailed description, taken in conjunction with the accompanying figures which illustrate, by way of example, the principles of the invention.Q: Getting element and text after element I want to get the text of an element, and the element (and, eventually, if any other element with the same class is found, the siblings of the sibling element), where the id is'myid'. For example: Do something The text after the element "Do something" The element "Do something" And so on. I can get the element "Do something
